Node JS – Express

The following exercise contains the following subjects:

- ◆ Express

Instructions

Write down the following endpoints with express:

- /users/
 - Get users: <http://localhost:3030/users>
 - Create a user: <http://localhost:3030/user> with post data
 - Delete a user: <http://localhost:3030/user?id=1> with query string
 - Update a user: <http://localhost:3030/user?id=1> with a query string and post data
- /products/
 - Get Products <http://localhost:3030/products>
 - Create a product: <http://localhost:3030/product> with a post data
- The way to test it, is using postman
- Use local object (json) to represent the list of objects

Submit the file to Hive.
